January / February **(1)** 1–100
March / April **(2)** 101–200
May / June **(3)** 201–300
July / August **(4)** 301–400
September / October **(5)** 401–506
November / December **(6)** 507–626

SUBJECT INDEX

Aerial imaging, NASA's Earth Observing System, surface imaging technologies, 301
Analytical electron microscopy
  color fluorescence, study of cyanine dye aggregates, AgBr emulsion crystals, 217
  silver halide emulsions, selective and nonselective reduction, 162
  three-dimensional halide analysis, individual silver halide grains by, 10
Analytical methods
  acrylic monomer shrinkage, molecular structure and crosslink formation, impact, 262
  analysis of goniometric reflection of light, measurement of surface topography, precision and accuracy factors, 489
  fluorescamine photoluminescence process, gelatin, determination of primary amine sites on lysine, during hardening process, 447
  image analysis and condition documentation, daguerreotypes, 145
  image recognition, pointed sets, 321
  interpretation of dielectric loss measurements, critical examination of models, photography, 464
  ionic equilibrium at solid/aqueous solution interfaces, use in derivation of individual cation interstitial and vacancy energies, 460
  microwave absorption investigations, $AgBr_{1-x}I_x$ crystals, 526
  photostimulated desorption technique, positive hole diffusion length and sensitization centers, AgBr emulsion grains, 135
  quantitative charge spectrometer, 538
  Raman scattering effect, semiquinonediimine of *p*-phenylenediamines, silver cluster adsorption, 229
  relationship study, amino acid content and reducing power, photographic gelatins, 172
  SIMS surface analysis, laser ablation transfer thermal imaging, investigation of dynamics, 565
  spectroelectrochemical studies, formation reaction kinetics, arylthio leaving pyrazolone magenta coupler, 28
  unpackaged thermal ink jet printing devices, testing, 68
  x-ray powder diffraction data, Rietveld refinement, $AgBr_{1-x}I_x$ emulsions, 532
Apparatus
  coating die internals, "infinite cavity" and corrected designs, comparison, 584
  photodetector arrays, image quality investigations, 44
Area-merging algorithms, for noisy cell contour extraction, 604
Artificial neural networks, classification by, mass and nonmass regions on mammograms, 598
Azomethine dyes, calculation of hues, progress, 24
Azo pigments
  layered photoreceptor, on photocarrier generation site, xerographic and structural investigations, 281
  metal/azo complexes, negative charge control agents, color toners, spectroscopic assessment, 81
  photogenerating bisazo, structure-sensitivity relationship, bilayer xerographic devices, 118
Book reviews
  Biomedical Photography, John Paul Vetter, 292
  Electrophotography and Development Physics, L. B. Schein, 97
  Gumoil Photographic Printing, P. Koenig, 392
  The Image Processing Handbook, John C. Russ, 196
  On the Nature of Things: The Scientific Photography of Fritz Goro, Thomas, Peter, and Stefan Goreau, 294
  Organic Photoreceptors for Imaging Systems, Paul M. Borsenberger and David S. Weiss, 391
  The Permanence and Care of Color Photographs: Traditional and Digital Color Prints, Color Negatives, Slides, and Motion Pictures, Henry Wilhelm, 197
  Science and Technology of Photography, Karlheinz Keller, Ed., 293
Cellulose triacetate, vinegar syndrome, effects and prevention, 249
Charge generation layers
  photocarrier generation site, azo pigment, xerographic and structural investigations, 281
  photogenerating bisazo pigments, structure-sensitivity relationship, bilayer xerographic devices, 118
Coatings
  die internals, "infinite cavity" and corrected designs, comparison, 584
  solvent, drying on continuous webs, model, 184
Color development, formation reaction kinetics, arylthio leaving pyrazolone magenta coupler, spectroelectrochemical studies, 28
Color images, Lippmann photographs, color rendition and archival properties, 507
Color printing
  ink-jet interchannel crosstalk compensation, experimental evaluation, 579
  microencapsulated photoactive color toners, preparation, sensitometry, and use of, 359
  thermal dye transfer printing, dye-polymer affinity, effect on, 571
Color proofing
  direct digital system, use of titanium dioxide photoreceptor and liquid toner, 440
  exact soft proofing, 432
Color reproduction
  color between the dots, 545
  Cycolor process, color fidelity analysis, 269
  image rendition, two-color separation signals, 551
  negative films, photographic sensitivity enhancement, emulsion optical properties, film layer order, 32

January / February **(1)** 1–100
March / April **(2)** 101–200
May / June **(3)** 201–300
July / August **(4)** 301–400
September / October **(5)** 401–506

Color printing
  ink-jet interchannel crosstalk compensation, experimental evaluation, 579
  microencapsulated photoactive color toners, preparation, sensitometry, and use of, 359
  thermal dye transfer printing, dye-polymer affinity, effect on, 571
Color proofing
  direct digital system, use of titanium dioxide photoreceptor and liquid toner, 440
  exact soft proofing, 432
Color reproduction
  color between the dots, 545
  Cycolor process, color fidelity analysis, 269
  image rendition, two-color separation signals, 551
  negative films, photographic sensitivity enhancement, emulsion optical properties, film layer order, 32

Color transparencies, Ektachrome 100 Plus Professional, thermochromism upon projection, 332
Conductive images, electrically conductive non-image area, by copper physical development, 125
Continuous web, solvent coatings, drying, model, 184
Copper complexes, nitrogen-, oxygen-, and sulfur-containing ligands, aging inhibitors, silver halide photographic layers, 234
Crystal growth
  precipitation of silver halide, emulsions and gelatin-free systems, 451
  quantum-sized AgBr clusters, kinetic formation processes, electron-trapping efficiencies, 201
Cyanine dyes
  aggregates, AgBr emulsion crystals, analytical color fluorescence electron microscopy, 217
  benzoxazole, photographic emulsions, structures/spectroscopy/performance in, 18
  J-aggregates adsorbed on AgBr emulsion crystals, direct observation by high-resolution scanning electron microscopy, 455
  metastable J-aggregate particles in solution, temperature-dependent size of, thermodynamic implications, 495
  spectral sensitization, mechanism, evolution of thinking, 101
Cycolor, color fidelity analysis, 269
Daguerreotype, condition documentation, image analysis and, 145
Defocused images, physical correlations and, assessment, 180
Densitometry, image tone reproduction and spatial frequency, suitable ΔD, 40
Developers
  semiquinonediimine of *p*-phenylenediamines, silver cluster adsorption, Raman scattering effect, 229
  two-component electrophotographic, tribocharging, experimental data and model predictions, 378
Development
  copper physical, electrically conductive non-image area, 125
  infrared photography, vapor-deposited silver sulfide thin films, 484
  liquid electrophotographic, with excess ions, 409
  magnetic cascade, 558
  selective and nonselective, silver halide emulsions, electron microscopic investigations, 162
Diazo materials, photosensitive, shelflife improvement, crown ether complexation, 131
Dielectric loss, interpretation of measurements, critical examination of models, photography, 464
Digital halftone images, direct digital color proofing system, use of titanium dioxide photoreceptor and liquid toner, 440
Dye fixation, potential use of clay-cationic dye complex for, thermal transfer printing, 575
Dye stability
  faded color photographs, reconstruction by electronic imaging, 520
  photographic three-color materials, mathematical bleaching models, 513
  thermochromism upon projection, Ektachrome 100 Plus Professional, 332
Dye transfer, thermal printing, dye-polymer affinity, effect on, 571
Earth studies, surface imaging technologies, NASA's Earth Observing System, 301
Electrophotography
  charge carrier transport, effect of dipole moment on, disordered organic matrices, dipole trap model comparison, 355
  charging process, contact charger roller, numerical simulation, 383
  direct digital color proofing system, use of titanium dioxide photoreceptor and liquid toner, 440
  liquid development, with excess ions, 409
  magnetic cascade development, 558
  magnetic toner, by suspension polymerization method, 415
  metal/azo pigment complexes, negative charge control agents, color toners, spectroscopic assessment, 81
  quantitative charge spectrometer, 538
  single-component development, review, 401
  toner melt under extension, semi-empirical constitutive model, 85
  two-component developers, tribocharging, experimental data and model predictions, 378
Electrostatic imaging, pyroelectric imaging process, mathematical analysis, 427
Films
  solvent coating, drying on continuous webs, model, 184
  vinegar syndrome, effects and prevention, 249
Frenkel defects, individual cation interstitial and vacancy energies in silver halides, derivation using ionic equilibrium, solid/aqueous solution interfaces, 460
Gelatin
  during hardening process, determination of primary amine sites on lysine, fluorescamine photoluminescence process, 447
  photographic, amino acid content and reducing power, relationship study, 172
GIS maps, SPOT survey, wild rice, Northern Minnesota, 594
Graphic arts
  color between the dots, 545
  medical imaging, silver halide photography, progress in, 36
Halftone color printing, color between the dots, 545
Hole traps, diffusion length, sensitization center properties, AgBr emulsion grains, photostimulated desorption technique, 135
Holography, Lippmann photographs, color rendition and archival properties, 507
Image analysis
  automatic target recognition, region-growing algorithm, 311
  classification of mass and nonmass regions on mammograms, by artificial neural networks, 598
  condition documentation and, Daguerreotypes, 145
  defocused words and physical correlations, 180
  image recognition correlation, pointed sets, 321
  MRI, T_2 calculations, linear versus nonlinear methods, 154
  Shroud of Turin, image formation and, 59
Image conservation, microform image protection, oxidation, 326
Image dyes, azomethine, calculation of hues, progress, 24
Image evaluation, image recognition correlation, pointed sets, 321
Image processing, algorithm for noisy cell contour extraction, via area merging, 604
Image quality
  continuous ink jet printing, dual ink densities, enhanced density resolution, 74
  exact soft proofing, 432
  investigation, photodetector arrays, 44
  optical image transfer, multilayer photographic materials, 339
  tone reproduction and spatial frequency, suitable ΔD, 40
Image reconstruction
  faded color photographs, by electronic imaging, 520
  mathematical bleaching models, photographic three-color materials, 513
Image stability
  aerial oxidation and, silver image, measurement by thiol, 140
  dye fixation, potential use of clay-cationic dye complex for, thermal transfer printing, 575
  nonsilver, Ni(II) chelate and N,N′-diphenylthiooxamide, 158
  thermochromism upon projection, Ektachrome 100 Plus Professional transparencies, 332
Infrared imaging
  automatic target recognition, region-growing algorithm, 311
  based on vapor-deposited silver sulfide thin films, 484
Ink-jet systems
  continuous ink jet printing, dual ink densities, enhanced density resolution, 74
  interchannel crosstalk compensation, experimental evaluation, 579
  unpackaged thermal ink jet printing devices, testing, 68
In memoriam, Warren L. Rhodes, v(5)

J-aggregates, metastable cyanine dye particles in solution, temperature-dependent size of, thermodynamic implications, 495
Kinetics
electron transfer, critical sized silver clusters, polyacrylate complexing, 54
formation reaction, spectroelectrochemical studies, arylthio leaving pyrazolone magenta coupler, 28
Laser, ablation transfer thermal imaging, investigation of dynamics, SIMS surface analysis, 565
Laser direct imaging, thermochemical decoloration image formation, phthalocyanine-layered film, patterned by UV light, 350
Latent image
delayed formation of specks, kinetic analysis, reduction-sensitized emulsions, 13
reduction sensitization centers and, silver microclusters on silver halide grains as, 1
Light-sensitive materials
critical sized silver clusters, polyacrylate complexing, electron transfer kinetics, 54
patterning by UV light, phthalocyanine-layered film, image formation by thermochemical decoloration, 350
Lippmann process, color rendition and archival properties, 507
Lithography, acrylic monomer shrinkage, molecular structure and crosslink formation, impact, 262
Magnetic cascade development, 558
Magnetic resonance imaging, T_2 calculations, linear versus nonlinear methods, 154
Medical imaging, graphic arts and, silver halide photography and, progress, 36
Microcapsules
color fidelity analysis, Cycolor process, 269
photoactive color toners, preparation, sensitometry, and use of, 359
Microform images, protection, oxidation, 326
Microlithography, thermo-developing photosensitive materials, triaryl phosphate esters application, 49
Microscopy, high-resolution scanning electron, thiacarbocyanine J-aggregates adsorbed on AgBr emulsion crystals, direct observation, 455
Microwave photoconductivity, transient, silver halide microcrystals, computer simulation, 475
Microwave spectroscopy, $AgBr_{1-x}I_x$ crystals, 526
Mobility effects, charge carrier transport, effect of dipole moment on, disordered organic matrices, dipole trap model comparison, 355
Motion picture film stability, vinegar syndrome, effects and prevention, 249
Multispectral sensors, NASA's Earth Observing System, surfacing imaging technologies, 301
Noise analysis
algorithm for noisy cell contour extraction, via area merging, 604
image quality investigations, photodetector arrays, 44
Nonimpact printing
contact charger roller, charging process, numerical simulation of, 383
ink-jet interchannel crosstalk compensation, experimental evaluation, 579
pulse-count-modulated dye diffusion thermal printing, printhead structure, thermal performance optimization of, 371
resistive ribbon printing technology, current and heat flow in, thermal-electric model, 365
Nonsilver images
Copper(II) complexes, with 1,2-dithiocarbamylhydrazine and 1-carbamyl-2-thiocarbamylhydrazine, 343
electrically conductive non-image area, copper physical development, 125
Ni(II) chelate and N,N′-diphenylthiooxamide, 158
Shroud of Turin, image formation, 59
Organic photoreceptors, single-layer, using n-type pigments and p-type phthalocyanine pigments, spectral sensitization mechanism, 421
Paper texture, surface topography measurement, by analysis of goniometric reflection of light, precision and accuracy factors, 489
Photodecomposition, diazo compounds, shelflife improvement, crown ether complexation, 131
Photographic emulsions
AgBr grains, positive hole diffusion length and sensitization center properties, photostimulated desorption technique, 135
gelatin-free systems and, precipitation of silver halide, 451
Photographic image stability
faded color photographs, by electronic imaging, 520
three-color materials, mathematical bleaching models, 513
Photographic materials
color negative films, photographic sensitivity enhancement, emulsion optical properties, film layer order, 32
multilayer, optical image transfer by, 339
silver halide photography, graphic arts and medical imaging, progress, 36
Photographic process, transient microwave photoconductivity, silver halide microcrystals, computer simulation, 475
Photographic processing, nonsilver images, copper(II) complexes with 1,2-dithiocarbamylhydrazine and 1-carbamyl-2-thiocarbamylhydrazine, 343
Photoluminescence, fluorescamine process, gelatin, determination of primary amine sites on lysine, during hardening process, 447
Photopolymerization
acrylic monomer shrinkage, molecular structure and crosslink formation, impact, 262
microencapsulated photoactive color toners, preparation, sensitometry, and use of, 359
Photopolymers, Cycolor process, color fidelity analysis, 269
Photoreceptors, charge carrier transport, effect of dipole moment on, disordered organic matrices, dipole trap model comparison, 355
Phthalocyanines
layered film, patterned by UV light, image formation by thermochemical decoloration, 350
p-type pigments, n-type pigments and, spectral sensitization mechanism, single-layer organic photoreceptors, 421
Platelets, hexagonal flake sedimentation, half-space, predictions and experiments in Stokes flow, 241
Polymer imaging, triaryl phosphate esters, thermo-developing photosensitive materials, application, 49
Polymerization, suspension method, magnetic toner prepared by, 415
Polymers, toner melt under extension, semi-empirical constitutive model, 85
Printheads
continuous ink jet printing, dual ink densities, enhanced density resolution, 74
thermal performance optimization, pulse-count-modulated dye diffusion thermal printing, 371
Print-out silver, silver halide suspension photolysis, red coloration, cause, 222
Pyroelectric imaging, mathematical analysis, 427
Reconnaissance, automatic target recognition, region-growing algorithm, 311
Remote sensing, SPOT survey, wild rice, Northern Minnesota, 594
Resistive ribbon printing, current and heat flow in, thermal-electric model, 365
Rhodamine 6G, clay-cationic dye complex, potential use for dye fixation, thermal transfer printing, 575
Sedimentation, hexagonal flakes in half-space, predictions and experiments, Stokes flow, 241
Sensitization
benzoxazole cyanine dyes, photographic emulsions, structures/spectroscopy/performance in, 18
latent image speck delayed formation, reduction-sensitized emulsions, kinetic analysis, 13
photographic gelatins, amino acid content and reducing power, relationship study, 172
reduction centers, latent image and, silver microclusters and silver halide grains as, 1

Sensitometry, optical image transfer, multilayer photographic materials, 339
Shroud of Turin, image formation and, 59
Silver bromide, emulsion crystals, cyanine dye aggregates, analytical color fluorescence electron microscopy, 217
Silver clusters
critical sized, polyacrylate complexing, electron transfer kinetics, 54
silver halide grains and, as latent image and reduction sensitization centers, 1
Silver halide emulsions
aging inhibition, cu(II) chelates, nitrogen-, oxygen-, and sulfur-containing ligands, 234
color negative films, photographic sensitivity enhancement, emulsion optical properties, film layer order, 32
reduction-sensitized, latent image speck delayed formation, kinetic analysis, 13
selective and nonselective reduction, electron microscopic investigations, 162
spectral sensitization, mechanism, evolution of thinking, 101
thiacarbocyanine J-aggregates adsorbed on AgBr crystals, direct observation by high-resolution scanning electron microscopy, 455
Silver halides
$AgBr_{1-x}I_x$ crystals, microwave absorption investigations, 526
individual cation interstitial and vacancy energies in, derivation using ionic equilibrium at solid/aqueous solution interfaces, 460
microcrystals, transient microwave photoconductivity in, computer simulation, 475
photography, interpretation of dielectric loss measurements, critical examination of models, 464
precipitation, emulsions and gelatin-free systems, 451
quantum-sized AgBr clusters, kinetic formation processes, electron-trapping efficiencies, 201
suspension photolysis, cause of red coloration, print-out effect, 222
three-dimensional analysis, individual grains, analytical electron microscopy, 10
x-ray powder diffraction data, Rietveld refinement, 532
Silver sulfide, vapor-deposited thin films, infrared photography, 484
Single-component development, electrophotography, review, 401
Solvents, coatings, drying on continuous webs, model, 184
Spatial frequency, image tone reproduction and, suitable ΔD, 40
Spectral sensitization, mechanism
evolution of thinking, 101
single-layer organic photoreceptors, n-type pigments and p-type phthalocyanine pigments, 421
Spectroscopy
print-out effect, photolysis of silver halide suspensions, cause of red coloration, 222
structures, and performance, benzoxazole cyanine dyes, in photographic emulsions, 18
surface-enhanced Raman scattering effect, semiquinondiimine of *p*-phenylenediamines, silver cluster adsorption, 229
SPOT survey images, wild rice, Northern Minnesota, 594
Stabilization
aging inhibition, silver halide emulsions, cu(II) chelates with nitrogen-, oxygen-, and sulfur-containing ligands, 234
microform image protection, oxidation, 326
photosensitive diazo compounds, shelflife improvement, crown ether complexation, 131
silver image, aerial oxidation and, measurement by a thiol, 140
Stokes flow, numerical predictions and experiments, hexagonal flake sedimentation in half-space, 241
Surface topography, measurement of materials, by analysis of goniometric reflection of light, precision and accuracy factors, 489
Thermal dye transfer, clay-cationic dye complex, potential use for dye fixation, 575
Thermal imaging
laser ablation transfer, investigation of dynamics, SIMS surface analysis, 565
pyroelectric imaging process, mathematical analysis, 427
triaryl phosphate esters, thermo-developing photosensitive materials, application, 49
Thermal jet printing, unpackaged devices, testing, 68
Thermal transfer printing
dye-polymer affinity, effect, 571
pulse-count-modulated dye diffusion, printhead structure, thermal performance optimization, 371
resistive ribbon printing technology, current and heat flow in, thermal-electric model, 365
Toner charge
color toners, metal/azo pigment complexes, negative charge control agents, spectroscopic assessment, 81
electrophotography, single-component development, review, 401
quantitative charge spectrometer, 538
Tone reproduction, image spatial frequency and, suitable ΔD, 40
Toner models, semi-empirical constitutive model, toner melt under extension, 85
Toners
magnetic, preparation by suspension polymerization method, 415
nonsilver images, Ni(II) chelate and N,N′-diphenylthiooxamide, 158
nonsilver photographic images, copper(II) complexes with 1,2-dithiocarbamylhydrazine and 1-carbamyl-2-thiocarbamylhydrazine, 343
thiol, silver image stability, aerial oxidation and image stabilization, measurement method, 140
Tribocharging, two-component electrophotographic developers, experimental data and model predictions, 378
Two-color separation, signals, color image rendition from, 551
Vinegar syndrome, effects and prevention, 249
Visual perception, defocused images, physical correlations, assessment, 180
Xerography
azo pigment, layered photoreceptor based on, photocarrier generation site, 281
bilayer devices, structure-sensitivity relationship, bisazo pigments, 118
charging process, contact charger roller, numerical simulation, 383
metal/azo pigment complexes, negative charge control agents, color toners, spectroscopic assessment, 81
X-ray analysis, mammograms, classification of mass and nonmass regions, by artificial neural networks, 598
X-ray diffraction, Rietveld refinement, characterization of $AgBr_{1-x}I_x$, 532
Zeolites, vinegar syndrome, effects and prevention, 249
